

## NEWS RELEASE

### **FibreSpan deploys high speed office connectivity for Citibase**

12 January 2006, UNITED KINGDOM: FibreSpan, the country's most affordable provider of dark fibre leased lines, has been awarded and delivered a contract to Citibase Plc, a leading serviced office company with a growing network of locations across the country.

Citibase contracted the leading independent ICT solution provider, Bailey Teswaine, to design and install a voice and data network at a new office location. The company also required a high speed link to a nearby site in the Victoria area of London.

Bailey Teswaine forged a partnership with FibreSpan to deliver the required connectivity between the two buildings. FibreSpan was selected over a number of providers, based on its established position as the most economical provider of dark fibre leased lines in the country.

Deployed in 28 days from initial enquiry to completion of network, the service utilises FibreSpan's unique fixed price dark fibre solution to deliver flexible and resilient high bandwidth services to Citibase staff and office tenants.

"Our relationship with Bailey Teswaine enabled us to quickly identify a best-fit solution for Citibase. We've provided the customer with a service which meets not only current but also future business needs, and we look forward to deepening our relationship further moving forward," comments Robert Bicket, CEO of FibreSpan.

**About FibreSpan** - [fibrespan.co.uk](http://fibrespan.co.uk)

FibreSpan is a fibre solutions company with a national telecommunications licence. It designs, installs, operates and leases private dark fibre circuits, working in partnership with health and education, local authorities and other multi-site organisations. Established in 2001, it is an independent UK national statutory utility, licensed by the DTI and regulated by Ofcom.

It is FibreSpan's goal to make fibre optic connectivity a viable solution for organisations throughout the UK. In order to achieve this, the company has invested in developing patent-pending microduct technology that is swiftly changing the face of fibre optic deployment – allowing access to bespoke dark fibre connectivity at an affordable and competitive rate.

FibreSpan offer an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its dark fibre networks offer unlimited bandwidth at a fixed cost for the term of the contract - a genuinely future proof solution. This puts FibreSpan in a unique position to enable clients to have complete control of future bandwidth demand.
