FibreSpan promotes unlimited bandwidth fibre networks for the health and public sector

01 May 2007, UNITED KINGDOM – FibreSpan, the premier provider of affordable private fibre networks, is pleased to announce that it will showcase at the forthcoming *GC 2007 Expo* to be held at Earls Court in London on 12 – 13 June 2007.

FibreSpan will be discussing its unlimited bandwidth multi-site local area network solution which is ideal for public sector and health organisations that require inter-site connectivity beyond their main network backbone. Its fixed price unlimited bandwidth model, with moderate capital costs and low recurrent costs, make it affordable to build high performance private fibre networks.

FibreSpan has worked with the public sector and national health services since 2002 and currently provides private fibre networks to many organisations across the country including Chesterfield Borough Council, London Borough of Camden, London Borough of Hammersmith, London Borough of Havering, Kingston Hospital NHS Trust, Stevenage Borough Council, Welsh Development Agency, Warwick County Council and Wirral NHS Trust.

“The industry is going through an era of transition. Traditionally demand has been met by managed services available from the leading telecom providers. Today establishments want virtually unlimited bandwidth networks that they can manage and control themselves,” comments Robert Bicket, FibreSpan’s Chief Executive Officer.

“With FibreSpan’s unique patent pending technology and competitive pricing model, the health and public sector can now afford to build their own all-fibre local area network. We are excited about bringing our solution to the visitors at GC 2007 Expo”.

Visit FibreSpan at stand 904.

GC 2007 Expo is the most exciting and dynamic public sector ICT exhibition and conference event of the year for public sector technologists. The event is jam-packed with the latest ICT products for the public sector, the best educational conference programme, best-practice examples of innovative IT public service delivery and inspirational workshops and seminars. Visit www.gcexpo.com for further information.

About FibreSpan - fibrespan.co.uk

FibreSpan is a fibre solutions company with a national telecommunications licence. It designs, installs, operates and leases private dark fibre circuits, working in partnership with health and education, local authorities and other multi-site organisations. Established in 2001, it is an independent UK national statutory utility, licensed by the DTI and regulated by Ofcom.

It is FibreSpan’s goal to make fibre optic connectivity a viable solution for organisations throughout the UK. In order to achieve this, the company has invested in developing patent-pending microduct technology that is swiftly changing the face of fibre optic deployment – allowing access to bespoke dark fibre connectivity at an affordable and competitive rate.

FibreSpan offer an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its dark fibre networks offer unlimited bandwidth at a fixed cost for the term of the contract - a genuinely future proof solution. This puts FibreSpan in a unique position to enable clients to have complete control of future bandwidth demand.
