

NEWS RELEASE

Top International Investment Bank Awards Contract to FibreSpan

FibreSpan, a national network carrier that specialises in dedicated dark fibre and ultra-high bandwidth network services, has announced hand-over of a point-to-point LAN extension to a top-tier international investment bank, head-quartered in the City of London.

The customer is relocating senior staff during a three-year redevelopment project at its head-quarters and needed to quickly and simply extend its existing communications network, comprising both fibre and copper technologies.

FibreSpan's experience in deploying dark fibre and high bandwidth network solutions, direct site-to-site network design and expertise in managing bandwidth solutions, has enabled it to plan and implement services between the two sites utilising a combination of dark fibre, copper and CAT5 technologies.

"This was the ideal solution for this customer and complements our core competency of providing dark fibre solutions," comments Robert Bicket, Chief Executive of FibreSpan. "Whilst we specialise in providing all-fibre solutions to customers, our technical and customer service teams are experienced in providing a complete range of network services".

FibreSpan's dark fibre solution is an ideal solution for banks, investment firms and trading firms where high-performance, resilience and control is absolutely critical. It provides dedicated point-to-point connectivity and a fixed price unlimited bandwidth model – a future proof solution fit for a rapidly changing environment.

About FibreSpan - fibrespan.co.uk

FibreSpan is a fibre solutions company with a national telecommunications licence. It designs, installs, operates and leases private dark fibre circuits, working in partnership with health and education, local authorities and other multi-site organisations. Established in 2001, it is an independent UK national statutory utility, licensed by the DTI and regulated by Ofcom.

It is FibreSpan's goal to make fibre optic connectivity a viable solution for organisations throughout the UK. In order to achieve this, the company has invested in developing patent-pending microduct technology that is swiftly changing the face of fibre optic deployment – allowing access to bespoke dark fibre connectivity at an affordable and competitive rate.

FibreSpan offer an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its dark fibre networks offer unlimited bandwidth at a fixed cost for the term of the contract - a genuinely future proof solution. This puts FibreSpan in a unique position to enable clients to have complete control of future bandwidth demand.
