

## NEWS RELEASE

### **FibreSpan wins second LINK Interchange Network contract**

12 June 2007, UNITED KINGDOM: FibreSpan, Britain's premier affordable dark fibre solution provider, has today announced that it has been contracted by the operator of the LINK cash machine network – the busiest shared ATM network in the world. The contract is for the second network link provided by FibreSpan.

The company was selected to continue its existing partnership with LINK, delivering dark fibre to incorporate an additional building in a LAN network extension.

FibreSpan was successful in tendering to provide dark fibre for high speed data services between two initial locations, selected because of its fixed price unlimited bandwidth model - making dark fibre affordable and putting LINK in control of its network.

"We are delighted to be working with LINK to extend their high speed LAN in Harrogate. The selection is an encouraging reflection of the increasing change in attitude and shift away from the traditional bandwidth restricted service providers," comments Robert Bicket, CEO of FibreSpan.

This second contract signing is testament to the success of the initial network build in terms of its performance, reliability and commercial feasibility.

## **About FibreSpan** - [fibrespan.co.uk](http://fibrespan.co.uk)

FibreSpan is a fibre solutions company with a national telecommunications licence. It designs, installs, operates and leases private dark fibre circuits, working in partnership with health and education, local authorities and other multi-site organisations. Established in 2001, it is an independent UK national statutory utility, licensed by the DTI and regulated by Ofcom.

It is FibreSpan's goal to make fibre optic connectivity a viable solution for organisations throughout the UK. In order to achieve this the company has invested in developing patent-pending microduct technology that is swiftly changing the face of fibre optic deployment – allowing access to bespoke dark fibre connectivity at an affordable and competitive rate.

FibreSpan offer an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its dark fibre networks offer unlimited bandwidth at a fixed cost for the term of the contract - a genuinely future proof solution. This puts FibreSpan in a unique position to enable clients to have complete control of future bandwidth demand.
