FibreSpan Provides Dark Fibre Connectivity to Multiple Clients within the Legal, Education, Retail and Public Sectors

In 2005, FibreSpan provided the **London School of Economics** with a high-bandwidth and high quality dark fibre communication link to provide remote connectivity from new student halls of residence to the LSE's IT Centre located off the Aldwych in London's West End. Continuing our long standing relationship with the university, we are delighted to announce that FibreSpan has been appointed to extend the existing network to meet the requirements of the university's expanding campus footprint.

We are also pleased to announce that FibreSpan is working with **Farrer & Co LLP**, the distinguished and successful London-based law firm, to provide inter-site dark fibre connectivity at their Lincoln's Inn Fields offices.

Further enhancing its solid reputation for providing dark fibre connectivity to the retail sector, FibreSpan is also pleased to announce that it is working in close partnership with one of the UK's best known retail groups. **Bhs Ltd**, which has appointed us to provide managed dark fibre and high-speed Ethernet services to the group's Marylebone House and North West House sites on Marylebone Road.

The London Borough of Brent is seeing increased demands for bandwidth within its office infrastructure and to enable the Council to proactively plan for future bandwidth and network capacity needs, has appointed FibreSpan to deliver a private dark fibre network connecting nine of the Council's key sites across Wembley.

Phase One of the network deployment is now complete, and the diverse infrastructure it provides facilitates both voice and data services to be delivered on a single network saving the Council both money and resources. Moving forwards, the Council will be able to maximise the versatility of their private dark fibre network and work with FibreSpan to further develop their network to meet their complex operational needs.

Following these recent appointments, Robert Bicket, Chief Executive of FibreSpan, commented “Since our inception in 2001, FibreSpan has grown from strength to strength. It is testament to our outstanding reputation as the most competitive dark fibre provider to multi-site organisations, in multiple market sectors, that we continue to attract new and prestigious clients. We are also delighted in our ability to continue to maintain close, long-term, relationships with clients whose network needs are continually evolving.”

End

About FibreSpan

FibreSpan is a network carrier specialising in dark fibre and ultra-high bandwidth services.

Established in 2001, FibreSpan designs, installs, operates and leases private dark fibre circuits, working with public sector, corporate and financial services organisations throughout the UK.

FibreSpan builds high bandwidth low latency private fibre networks that put you in control, providing flexibility in managing IT across multiple sites or offices.

FibreSpan offers an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its bespoke fibre networks offer scalable bandwidth at a fixed cost for the term of the contract – a genuinely future-proof solution.

FibreSpan is an ISO 9001 accredited national telecommunications company (with code powers) licensed by the DTI and regulated by Ofcom.
