

**FibreSpan** 

Bringing fibre to your door

Fibre connectivity now costs less than you think...

## **NEWS RELEASE**

### **University of Liverpool gets connected with second FibreSpan link**

3 May 2006, UNITED KINGDOM: University of Liverpool today announced that it will continue to upgrade its city-wide network infrastructure with a second dark fibre network designed, built and maintained by FibreSpan.

Connecting the Carnatic Halls of Residence and the University's main city-wide backbone, FibreSpan's solution facilitates the transport of high bandwidth voice, data and IP services across secure, dedicated fibre network. By providing increased speed, flexibility and scalability, the installation will form an integral part of the University's city-wide network upgrade.

As a key phase of this major programme, the University was attracted to FibreSpan's fixed price dark fibre leased line solution, delivered at a significantly lower cost than traditional providers.

The dedicated dark fibre network upgrade will enable the customer to confidently deal with the increasing volumes of data traffic generated by growing student numbers and next generation multimedia content. FibreSpan provides the foundation for a long term future proof high bandwidth solution, leveraging its patent pending microduct technology to deploy dark fibre significantly faster and at a lower cost than traditional deployment methods.

## **About FibreSpan** - [fibrespan.co.uk](http://fibrespan.co.uk)

FibreSpan is a fibre solutions company with a national telecommunications licence. It designs, installs, operates and leases private dark fibre circuits, working in partnership with health and education, local authorities and other multi-site organisations. Established in 2001, it is an independent UK national statutory utility, licensed by the DTI and regulated by Ofcom.

It is FibreSpan's goal to make fibre optic connectivity a viable solution for organisations throughout the UK. In order to achieve this the company has invested in developing patent-pending microduct technology that is swiftly changing the face of fibre optic deployment – allowing access to bespoke dark fibre connectivity at an affordable and competitive rate.

FibreSpan offer an end-to-end service that includes consultation, network planning, rapid deployment and comprehensive support. Its dark fibre networks offer unlimited bandwidth at a fixed cost for the term of the contract - a genuinely future proof solution. This puts FibreSpan in a unique position to enable clients to have complete control of future bandwidth demand.
